Learnings from 2020 and how to accelerate action in 2021

The **World Economic Forum Global Futures Council on Cities of Tomorrow**, together with **EAT** and **Novo Nordisk**, is hosting a panel debate that will bring together leaders from public health, food, cities, behavioral change and other areas to reflect on the learnings from COVID-19.

- New perspectives and insights to the diabetes and obesity challenge in light of COVID-19
- Innovative and collaborative approaches to the prevention of diabetes and obesity, in particular when it comes to addressing systemic food challenges
- How to accelerate actions that address health inequality and build healthier and more sustainable communities

Tune in to the discussion with:

Alice Charles
